INTRODUCTION

This catalogue supplements the green Index to Assessment Work in the La Ronge Mining District (Miscellaneous Report 79-4). Most of the entries are records of assessment work submitted from 1979 to 1982 in compliance with The Mineral Disposition Regulations, 1961. Each entry follows this format:

COMPANY (or CLAIM HOLDER)	Type of work, by whom
Geographical location	Report, number of maps, author
PROPERTY	Assays, analyses
Latitude and longitude	
FILE NUMBER	Date of work

Confidential files (as of May 31st, 1985) are indicated by an asterisk after the date of work. Elements determined by assay or analyses are listed for open files if present as a trace or more. Assays with negative results are also shown. Ore minerals reported in drill hole records or in geological surveys are included if present in a significant amount.

The assessment work is grouped according to the National Topographic System of numbering map sheets, thus 74-H-4. Further subdivision into NE, NW, SE, SW quarters is made where appropriate. Apart from broad or regional surveys, work that overlaps more than one map sheet is listed in all the sheets involved. Broad or regional surveys are listed once at the beginning of each lettered sheet, for example 74-H, with the specific map sheet numbers given in parenthesis at the end of the entry, for example (covering parts of 74-H-6, 7, 9, 10, 11).

Non-confidential assessment files may be examined in the Geological Survey of Saskatchewan Energy and Mines in Regina (12th Floor, Toronto-Dominion Bank Building, 1914 Hamilton Street) or at their office in La Ronge. Paper copies of non-confidential reports and maps are available at both places. Details of drill core stored at Saskatchewan Energy and Mines core laboratory at La Ronge are available as Open File Report 85-3.

Word processing of the text was handled efficiently and diligently by Jagdish Bilkhu and Cheryle Mitchell.

ABBREVIATIONS

Ag	silver	Mn	manganese	ddh	diamond drill hole
Al	aluminium	Mo	molybdenum	pdh	percussion drill hole
As	arsenic	N	nitrogen	rdh	rotary drill hole
Au	gold	Ni	nickel	odh	overburden drill hole
B	boron	O	oxygen	rcdh	reverse circulation drill hole
Ba	barium	P	phosporus		
C	carbon	Pb	lead		
Ca	calcium	Rn	radon		
Co	cobalt	S	sulphur	asp	arsenopyrite
Cu	copper	Sb	antimony	cp	chalcopyrite
F	fluorine	Si	silica	gf	graphite
Fe	iron	Sr	strontium	po	pyrrhotite
He	helium	Th	thorium	py	pyrite
K	potassium	U	uranium	ra	radioactive minerals, radioactivity, radioactive
Li	lithium	V	vanadium		
Mg	magnesium	Zn	zinc	sp	sphalerite

Waterbury Lake area
MPP 1011, CBS 4663 to 4665
Lat 57-54 to 58-23 Long 104-22 to 43
74I02-0006

Photogeology, radiometric traverses,
airborne radiometric surveys lake margins,
lake water and sediment sampling, Maxi-Probe
EMR-16 and pulse E M surveys
Report, 3 volumes, 16 maps, by K Schimann
1980 *

PROPERTY INDEX

The following index lists properties as claims, claim blocks, permits, leases, and other areas. A single page number is given for each assessment file and refers to the NTS area under which the work is filed. The work also appears on other pages if it overlaps more than one map sheet, but no page numbers are given for these additional entries. Where a property appears more than once on a page this is indicated in parenthesis after the page number.

Mineral prospecting permits granted under The Mineral Disposition Regulations were originally identified by owner. They were renumbered consecutively with the prefix MPP in 1979 to eliminate confusion resulting from changes in ownership.

* confidential
